Work & Education

- Late 2017 Digital Content Creator - Huddle Media
I worked with various brands where I used my skills in Photoshop, After Effects & Premiere pro to create content for their social media channels.
- 2014 - 2017 2.1 / First - Multimedia Computing (BSc)
Studying Multimedia Computing helped me discover my talents and what I wanted to do with my career. I learnt skills in 3D Matchmoving, 3D & 2D animation, Video Production & Story Telling, Pervasive Systems Design, Games Design, and more.
- 2012 - 2014 A Levels - Law, Computer Science, Theatre Studies
- 2010 - 2012 11 GCSE's grades A - C including Maths, English and Sciences

Skills

Premiere Pro	
After Effects	
Photoshop	
Muse	
3DS Max	
Maya	
Matchmover	
Boujou	
Unity	
Directing	
Script Writing	
Cinematography	
Photography	

Interests

I have had a strong interest in technology ever since building my first computer back in 2012. This is what sparked an interest in technology and software.

I have a passion for digital content creation from video to photomanipulation to websites. I started creating videos back in 2011 using iMovie and since then I have been self taught in Premiere Pro, After Effects and other Adobe Software.

Whilst at university we have been taught 3D Modeling Software. The university taught us 3DS Max for animation however I found that Maya was more advanced for animation and have been learning that in my spare time.

Why Hire Me?

I can be self motivated as well as work in a team. I am punctual and can set myself realistic deadlines.

I am experienced and confident in digital media creation and I am confident I can bring something unique to the role.

If you have any questions about me or my skills please don't hesitate to contact me or visit my website.
